

Explant Express®

Breast Implant Suction Retrieval Device

NEW

Rapid Removal

Avoids spillage of ruptured implants – keeping silicone gel away from gloves, instruments, and surgical field.

Intuitive Design

Effortless performance requires no advanced training. Ergonomic no-slip design is suitable for all hand sizes.

Cost Effective

Universal compatibility with standard operating room suction. Rapid retrieval reduces operating time.

Avoid the mess with Explant Express®!

Innovating. Educating. Changing Lives.™

Explant Express®

Breast Implant Suction Retrieval Device

Engineered for Simplicity

Redefining the standard of care, the Explant Express® streamlines the breast implant removal process. This cost-effective solution features a universal design, suitable for a variety of breast implant sizes. While traditional removal methods often take up to an hour, the Explant Express® can remove a ruptured implant in a matter of seconds.¹ The device's separable halves allow for post-procedural inspection of extracted material.
